WAV Recognizes SkyPilot for Four Years of Partnership

Aurora, IL-December 2nd, 2011 – WAV, Inc., the full-service, value added distributor of wireless broadband and MESH, networking and WLAN, mobile and rugged computing, data collection, RFID and printers and physical security solutions, has announced its recognition of SkyPilot by Trilliant, a provider of carrier-class broadband wireless systems, for dedication and superior service the past four years.

The SkyPilot solution is a high-capacity mesh backhaul network with a variety of integrated local access options. The flexible point-to-point, point-to-multipoint and mesh configurations combined with advanced antenna arrays extend reach and mitigate interference. The architecture is a highly scalable and reliable approach that simplifies design, increases deployment flexibility and reduces equipment and operating costs.

“WAV is proud to be aligned with SkyPilot for four years,” said Norm Dumbroff, president and CEO of WAV, Inc. “In this industry, it pays to know and grow with our vendors through the test of time. Our dedication to SkyPilot, and their dedication to us, allows us to provide reliable technical and engineering support and services, ever increasing the value added to Solution Providers.”

WAV has one of the largest stocking positions throughout North America for wireless products and solutions. Manufacturers are carefully considered for their high quality solutions and complementary qualities to other existing WAV product lines - offering ISV, Solution Provider and Reseller's customers not just one wireless solution, but a variety of complementary technologies that will maximize project capabilities and bottom line.

WAV carries a line of more than 50 manufacturers, and provides a variety of value added services surrounding these product lines which include pre-sale and post-sale technical support, site surveys and installations, demo programs, leasing, maintenance contracts, and repair services.
